Choose an object to count (for example, stickers or stamps).

Notice something about this object that you can count by 2s, 5s, 10s, or any other number.

Number your construction paper on the left side from 1 to 6.

Arrange your objects on your paper with 1 object in the first row, 2 objects in the second row, and so on.

Write an equation to show how you counted the number of items.
