LOSING TEETH

To complete this task you should:

◆ Collect the information.
◆ Represent the number of teeth lost by each member of your group with a white paper square and make a graph.
◆ Answer the questions and write at least one statement about what you noticed.

Ask at least nine students in your class how many teeth they have lost. Record your lost teeth, too.

How many teeth is that all together? ___

______________________________
Make a graph to show your results and then answer these questions.

Who lost the most teeth? ______________
_______________________________

Who lost the fewest teeth? _____________
_______________________________

What else did you notice about the data? ____________________________
