Today, you’ll solve one of the following word problem about a situation that happened on a farm or ranch. Illustrate the situation and write and equation to show how you solved it. Be ready to present your work to the class.

a) I see 8 horses in the field. Three are brown and the rest are black. How many are black?

b) Ken had 9 goats and Kait had 7. How many more goats does Ken have than Kait?

c) The farmer had 6 chicks, but he can only find 4. How many are missing?
d) Four robins were looking for worms. A few more joined them and now there are 7. How many robins came to join the robins?

e) Two cats and 7 dogs were playing on the grass. How many pets were playing on the grass?
